WHAT OUR CUSTOMERS SAY

“The flexibility of the system allowed us to implement our first Human Resources Management System in a very efficient and cost effective manner. When we installed info:HR, their staff went beyond any reasonable expectations for training and customer service.”

“info:HR helps give back to staff control over their use of company resources. It is an investment that we should have made some time ago.”

“We found info:HR to be indispensable in terms of the information it provided us during our recent organizational restructuring.”

“The combination of ease of use and an excellent set of reports make data entry and information access a quite simple process. From the standpoint of HR, the acquisition of info:HR was one of our best decisions.”

answers+insights

How much vacation time do I have left?

Who is scheduled for training programs in the next quarter?

How much will a 2% increase in hourly wages cost?

When is my next salary review?

Too many questions? Let us help you find the answers.

We make finding answers easy. As easy as 1, 2, 3. One product: info:HR. Two key goals: Perfect the product. Support the customer. Three valuable benefits:

1. an easy-to-use interface
2. a customizable modular design
3. tailored pricing that allows you to purchase only what you need

The info:HR software suite is made up of modules that work together to provide a customizable, integrated system. Our approach gives you the flexibility to purchase only the modules you need today, while keeping open the option of integrating additional modules in the future. info:HR enables human resources professionals to gather crucial human capital system data with speed and accuracy, generating of reports for salaries, benefits, work history, skills, absences, performance reviews, and more.

Plus, our flexible, secure self-serve web-based modules facilitate project control and data gathering—over the internet at home or on the road—while reducing paperwork and improving workflow.

But it is the quality and accessibility of our support that sets us apart from other human resources management systems providers. info:HR customers enjoy access to one of the most comprehensive support systems in the industry, with unlimited contact via phone, email, and fax with HRSS' human resources and technical support specialists.

The info:HR team provides the critical support you need to ensure high-quality, accurate human capital management. Not just technical support, but hands-on help with implementation, on-site training, long term project management, and regular documented upgrades and new features.

info:HR is in use at a wide range of organizations in the public and private sectors, at municipal governments, automotive parts manufacturers, high tech firms, insurance companies, non-profits and financial institutions. Companies using info:HR range in size from under 100 to over 11,500 employees.

User-friendly, robust and adaptable, INFO:HR is the system of choice for busy HR departments across North America.

We're in the business of providing solutions that help organizations like yours create value through effective human capital management. info:HR is completely scalable and runs on/ with: MS-SQL Server, Access, Crystal Reports, Oracle, Internet Explorer, Internet Information Services (IIS).
